Release Notes 2.1.2
May 16, 2004

The following items have been moved (migrated) to Production for use by Agencies beginning on May 16, 2004.

- An update was made to the concurrent hire process. The CAN number is now required when processing a concurrent hire.

- An update was made to the CAN number field to only allow the field to be updated on actions with the following NOA's:

  - 100 – 199 Series
  - 702
  - 713
  - 740
  - 790

  - 500 – 599 Series
  - 703
  - 721
  - 741
  - 952

  The CAN number will be grayed out on actions with all other NOA's.

- A fix was applied to resolve the issue that prevented users from deleting bonds. Users can now successfully delete bonds.

- A fix was applied to the SF-50 to include the correct capping logic for employee's whose annual salaries are capped.

- A change was made to the Employee Express outbound process. The locality from the employee's address record will now display on the employee's Employee Express account. Previously, the locality from the employee's local tax data record was displayed on the employee's Employee Express account.

- A fix was applied to the separation date on the employment data pages. The employee's separation date on the employment page is now equal to the effective date of the termination action.

- Update scripts were executed to resolve some data discrepancies between the CIDB and the CIDB 260. This resolved a number of discrepancies, however, development to the CIDB/CIDB 260 and data cleanup is required to resolve the remaining errors.

- A fix was applied to the concurrent hire process for the ethnic group field. This field value will default from the employee's highest effective dated row on their first appointment.

- A fix was applied to the capping logic for employee's receiving Standby Duty pay to prevent employees who receive Standby Duty pay from being overpaid.

- The following pay tables were updated in EHRP: 008R and 010R.
